DETAILED ACTION

Continued Examination Under 37 CFR 1.114

- 1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 25, 2008 has been entered.
- 2. The rejection of claims 52 and 72-77 under 35 U.S.C. 112, 2nd paragraph, is withdrawn in light of the claim amendment.
- 3. The rejection of claims 48-51, 53-65, 67, 70, and 71 under 35 U.S.C. 112, 1st paragraph, is withdrawn in light of the claim amendments or cancellations.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Art Unit: 1638

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 66 and 78-83 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-6 of U.S. Patent No. 6,160,206, as evidenced by Randolph-Anderson et al. (Plant Mol. Biol. 38: 839-859, 1998). Although the conflicting claims are not identical, they are not patentably distinct from each other. Instant claims 66, 78-83 are drawn to an isolated DNA fragment 2.6 to 13.8 kb in length, can be detected by hybridization to SEQ ID NO: 1 under the recited conditions, encodes an amino acid sequence in which the amino acid at position corresponding to 13 of SEQ ID NO: 1 is not valine, and wherein the fragment has the ability to confer resistance to protoporphyrinogen oxidase-inhibiting herbicides in cells of Chlamydomonas when introduce therein. Claims 1-4 of '206 encompass any isolated DNA fragment having a size of approximately 3.4 Kb, 9.9 kb, 10 kb, or 13.8 kb, obtained from Chlamydomonas reinhardtii and exhibiting resistance to porphyrin-accumulating type herbicides in algal cells when expressed therein. Claim 5 of '206 is directed to an isolated DNA comprising SEQ ID NO: 1. Claim 6 of '206 encompasses plasmids containing said DNA. Examples 1-4 of '206 define the isolated DNA claimed therein. SEQ ID NO: 1 of '206 is from a mutant gene of C. reinhardtii and encodes a PPO that is resistant to PPO-inhibiting herbicides. The mutation is a change of guanine to adenine, resulting in a change of valine to methionine in the encoded amino acid sequence, as evidenced by Randolph-Anderson et al. who also describe the isolation and

Art Unit: 1638

sequencing of this same mutant gene (pages 851-852). The mutated amino acid corresponds to the amino acid at position 13 of instant SEQ ID NO: 1. Isolated DNA fragments encompassed by the claims of '206 inherently have the same properties as those encompassed by the instant claims.

Page 4

An obviousness-type double patenting rejection over the claims of '206 was previously made in the Office action mailed August 14, 2001. The Office action mailed April 9, 2002 indicated that the rejection was withdrawn in light of a terminal disclaimer filed January 25, 2002. However upon further review, that terminal disclaimer was only directed to related U.S. application 09/371,507 and did not mention U.S. 6,160,206.

5. Claims 52, 59, and 72-77 are allowed.

Contact Information

Any inquiry concerning this or earlier communications from the Examiner should be directed to Ashwin Mehta, whose telephone number is 571-272-0803. The Examiner can normally be reached from 8:00 A.M to 5:30 P.M. If attempts to reach the Examiner by telephone are unsuccessful, the Examiner's supervisor, Anne Marie Grunberg, can be reached at 571-272-0975. The fax phone numbers for the organization where this application or proceeding is assigned are 571-273-8300. Patent applicants with problems or questions regarding electronic images that can be viewed in the Patent Application Information Retrieval system (PAIR) can now contact the USPTO's Patent Electronic Business Center (Patent EBC) for assistance. Representatives are available to answer your questions daily from 6 am to midnight (EST). The toll free number is (866) 217-9197. When calling please have your application serial or patent number, the type of document you are having an image problem with, the number of pages and the specific nature of the problem. The Patent Electronic Business Center will notify applicants of the resolution of the problem within 5-7 business days. Applicants can also check PAIR to confirm that the problem has been corrected. The USPTO's Patent Electronic Business Center is a complete service center supporting all patent business on the Internet. The USPTO's PAIR system provides Internet-based access to patent application status and history information. It also enables applicants to view the scanned images of their own application file folder(s) as well as general patent information available to the public. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

Application/Control Number: 09/331,723 Page 5

Art Unit: 1638

applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov.

For all other customer support, please call the USPTO Call Center (UCC) at 800-786-9199.
